

YOUR DOG IS FAMILY.

WHEN THEY'RE MISSING, WE SEARCH.

Sighting-led thermal drone searches, expanding coverage and a dedicated partner helping bring your dog home.

3-4 HOUR INITIAL SEARCH

Thermal + visual coverage

FLIGHT VIDEOS + MAPS

A record of every search

RECOVERY SUPPORT

Help locating and catching

OUR RECOVERY PROCESS

A search built around your dog

We learn the details

01

Review the last sighting, direction of travel, temperament, recent tips and familiar locations.

We build a moving plan

02

Prioritize confirmed sightings, likely travel corridors, road crossings and safe launch locations.

We search from the air

03

Use thermal and visual cameras to scan fields, trails, tree lines, waterways and likely travel routes.

We help with recovery

04

If your dog is spotted, we work with you to confirm the sighting and plan a calm, safe recovery.

A LOST DOG SEARCH NEEDS FLEXIBLE COVERAGE

TRAVEL ROUTES

Missing dogs may move along roads, trails, fields, creeks, tree lines and familiar routes. Recent sightings guide where the search expands.

CALM RECOVERY

Pursuing a frightened dog can push it farther away. We help coordinate quiet sightings, familiar people, food and a safe approach.

HONEST EXPECTATIONS

Thermal cameras detect visible heat signatures; they cannot see through roofs, walls, glass or heavy cover. Weather, legal airspace, property access and your dog's behavior can affect timing and coverage. No drone search can guarantee that an animal will be located or recovered.

Follow the clues. Keep moving.

Dogs can travel quickly, so coverage follows confirmed sightings, likely routes and where your dog may be heading.

3-4 HRS

INITIAL SEARCH

Return searches: up to 4 hours

EXPANDS

SIGHTING-LED AREA

Based on sightings and travel routes

MULTIPLE

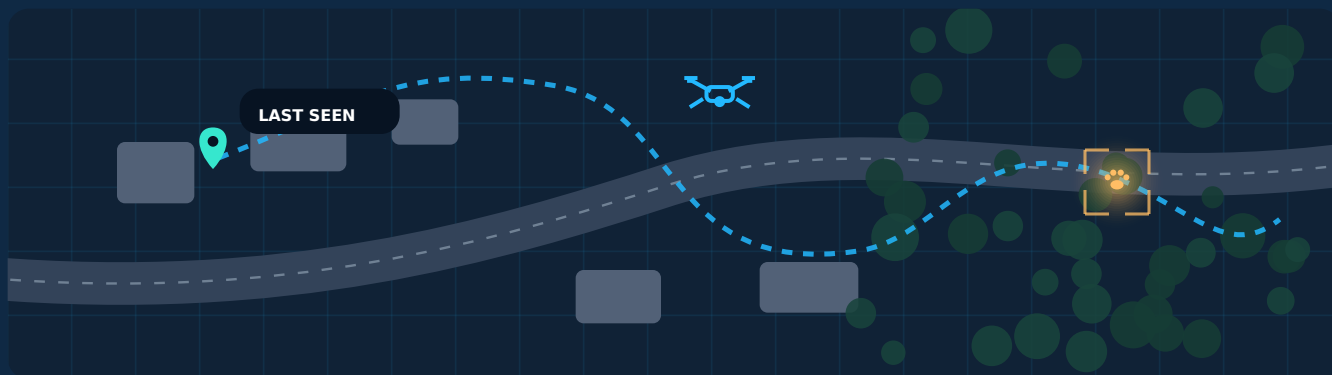

FLIGHTS + PASSES

Battery changes as the plan requires

HOW MUCH GROUND DO WE COVER?

We follow sightings and likely travel routes.

HOW A SIGHTING-LED DOG SEARCH CAN LOOK

● Last known location

● Planned flight route

● Thermal target checked

WHAT WE ARE DOING DURING YOUR SEARCH

Start at the last sighting

Review recent tips, direction of travel, temperament, familiar places and nearby hazards.

Follow likely routes

Search roads, trails, fields, wooded edges, waterways and corridors a moving dog may follow.

Recheck promising targets

Use thermal and visual cameras, zoom, alternate angles and additional search passes.

Coordinate a calm recovery

Help verify sightings and plan a safe approach with familiar people, food or containment.

WHAT CAN CHANGE SEARCH TIME OR COVERAGE?

There is no single fixed search radius for a moving dog. Search coverage depends on recent sightings, distance traveled, weather, battery changes, legal airspace, property access and available safe launch positions.

Be ready. Stay informed.

Everything we need, everything you receive and exactly how your search pricing works.

BEFORE WE ARRIVE

Have these details ready

- ✓ A recent photo, your dog's name, breed and coloring.
- ✓ The last sighting, time, direction and any reliable tips.
- ✓ Temperament, favorite food and medical or safety concerns.
- ✓ Nearby roads, trails, water and familiar destinations.
- ✓ Do not chase; tell us immediately about new sightings.

WHAT SKYVIEW PROVIDES

More than a flight

- ✓ A planned 3-4 hour thermal and visual drone search.
- ✓ Communication and updates throughout your search.
- ✓ Videos of the drone flights so you can review what we saw.
- ✓ Maps of the flight routes showing the areas searched.
- ✓ Help confirming, approaching and trying to catch your dog.

IF YOUR DOG IS SPOTTED

We work with you to bring them home.

We will help confirm the sighting, coordinate a calm approach and try to safely contain or catch your dog. Depending on the situation, that may mean guiding a familiar person to the location, using food or arranging safe containment.

STRAIGHTFORWARD PRICING

Know the cost before we begin.

\$200

ON-CALL FEE

Initial search deployment

60 mi

INCLUDED

Round-trip miles, first trip

\$1.50

PER EXTRA MILE

Beyond included mileage

RETURN SEARCHES - UP TO 4 HOURS

No additional on-call fee. The first 30 round-trip miles are included; additional miles are \$1.50 per mile.

EXAMPLE: 60 MILES ONE WAY

Initial search: 120 round-trip miles

$\$200 + (60 \times \$1.50) = \$290$

Return visit: same location

$(90 \times \$1.50) = \135
